hi, Barbara and Andrew. here is the latest iteration of the cancer dose-response section. :-(
some of the straight-forward suggestions i just accepted and they disappeared, but i wasn't rigorous about it. a lot of stuff i left for context because my subsequent revisions were a result of your suggested revisions. if you accept my changes, you can go ahead and accept the pre-existing revisions, unless i made some comment needing more response. let me know if i missed anything – it's all such a mess it was hard to keep track, and let me know if you have any further comments or questions. thanks. jj

Subject: Cancer dose-response section

Hi Jennifer,

The draft is looking good.

Barbara and I had some editing suggestions (see attached), which are mostly organizational or aimed at improving clarity. We are happy to meet to discuss with you any comments that are unclear, but we think addressing them should be fairly straightforward.

Please take a look and let us know by when you think you could address these comments (or anything else that you were intending to add) so that we can wrap up this section and add it to the compiled draft.

Thanks again, and happy Friday.
Barbara and Andrew
